

MPRC PN: 9580710

Accessory Drive Housing Gasket Kit

MPRCSeals.com provides premium gaskets and engine kits to fit engine models 567/645 and 710. We offer three select material options for your specific sealing requirements: CG1, CG2, and our newest gasket material-CGX. CGX was developed to mold into slight metal imperfections found on flat surfaces that other materials fail to seal. We offer individual gasket parts such as 40040015 (accessory drive housing to block gasket) in all three material options.

Call today at 800-397-3429 or visit us at mprcseals.com to see if CGX is right for your application.

Since 1982, Master Packing & Rubber Company has become a sealing specialist recognized by OEM's, Railroad, Marine, and Power Generation Companies, providing innovative sealing solutions for some of the most demanding applications. Keeping the engine sealed is a primary goal, and using MPRCSeals.com premium materials has significantly improved this goal.
