Fuel Jumper Seal

In 2009, MPRC was contacted and approached regarding the review and analysis of EMD engine fuel- jumper line leaks that have been a contributing factor to engine oil fuel-dilution issues. After identifying the metal seat imperfections on each end of the jumpers, MPRC developed an innovative fuel jumper line seal from our proprietary Genuine Chemours™ Viton™. Compounded for Fuel Resistance, MPRC's Genuine Chemours™ Viton™ material increases performance levels to endure the harshest engine operational environments between overhaul cycles.

Contact MPRC today to see how our proprietary Genuine Chemours™ Viton™ Fuel Jumper Seal can help you prevent engine oil fuel dilution and eliminate dangerous high-pressure fuel leaks.

MPRCseals.com: Quality products designed, engineered, and made with the highest-quality materials from the fluid sealing specialists you've come to trust. Veteran owned and trusted since 1982.
