Overspeed Trip Housing Gaskets and Kits

MPRC offers a wide range of sealing materials from our CG1, CG2, and our newest material- our "CGX." MPRC's Style CGX has been developed and engineered to mold into slight imperfections found on metal surfaces that other gasket materials fail to seal. Contact us to see if CGX is right for your application.

Since 1982 MPRC has become a sealing specialist recognized by OEMs, Railroad, Marine, and Power Generation Companies providing superior material solving sealing issues. Keeping the engine sealed is a constant target and using MPRC materials has significantly improved our goal.
